

"Futrix Health with features such as Linked Measures and Cohort Analysis Groups has created a new break-through in health data analysis which I have not seen in the industry. Futrix Health has allowed MDwise to effectively leverage disparate data while performing critical Medicaid analytics."

Rush Daugette | Director of Health Analytics | MDwise, Inc.

MDwise is a not-for-profit company serving Hoosier Healthwise, Care Select and Healthy Indiana Plan (HIP) members. MDwise has been giving the best possible health care since 1994. MDwise has a variety of programs and capabilities to meet the special medical and social needs of the Medicaid population. MDwise services are provided to more than 280,000 members in partnership with over 1,400 primary medical providers.

MDwise is using Futrix Health to link many disparate data sources such as eligibility, claims, demographic information, capitation, and fee-for-service payment schedules. MDwise has used Futrix for Claims Excellence and payout audits, the evaluation of many payors for Medicaid reimbursement, creation of mailing lists for marketing, ad hoc reporting and dashboard analysis for payor clinical and financial trending as well as QA analytics.

MDwise has been able to create complex analytics and metrics using the revolutionary features in Futrix Health such as Linked Measures to create and drill anywhere with PMPM clinical metrics, and Cohort Analysis Groups to measure and benchmark payors. Close evaluation and monitoring of Medicaid programs is required to deliver care with efficacy and negotiate reimbursements arrangements. MDwise is leveraging Futrix Health to optimize their analytics and ROI.
